

Defensible Space

Chipper Program Dump Trailer Program

Williams Rural Fire Protection District

Call us, use the QR code below, or go to our website to sign up for a free defensible space Home Assessment or to participate in our Chipper or Dump trailer programs. In cooperation with Applegate Fire District, WRFPD can help local property owners chip and remove vegetation debris once it has been cut and piled.

WRFPD wants to help keep your property safe. Having a defensible space around your home and reducing or eliminating vegetation around your home is one of the best things a homeowner can do to protect their home from wildfire. Contact us today to find out more details about our programs.
